

LISMORE SUBURB Flood & Floor Levels

Floor/Flood Level Disclaimer

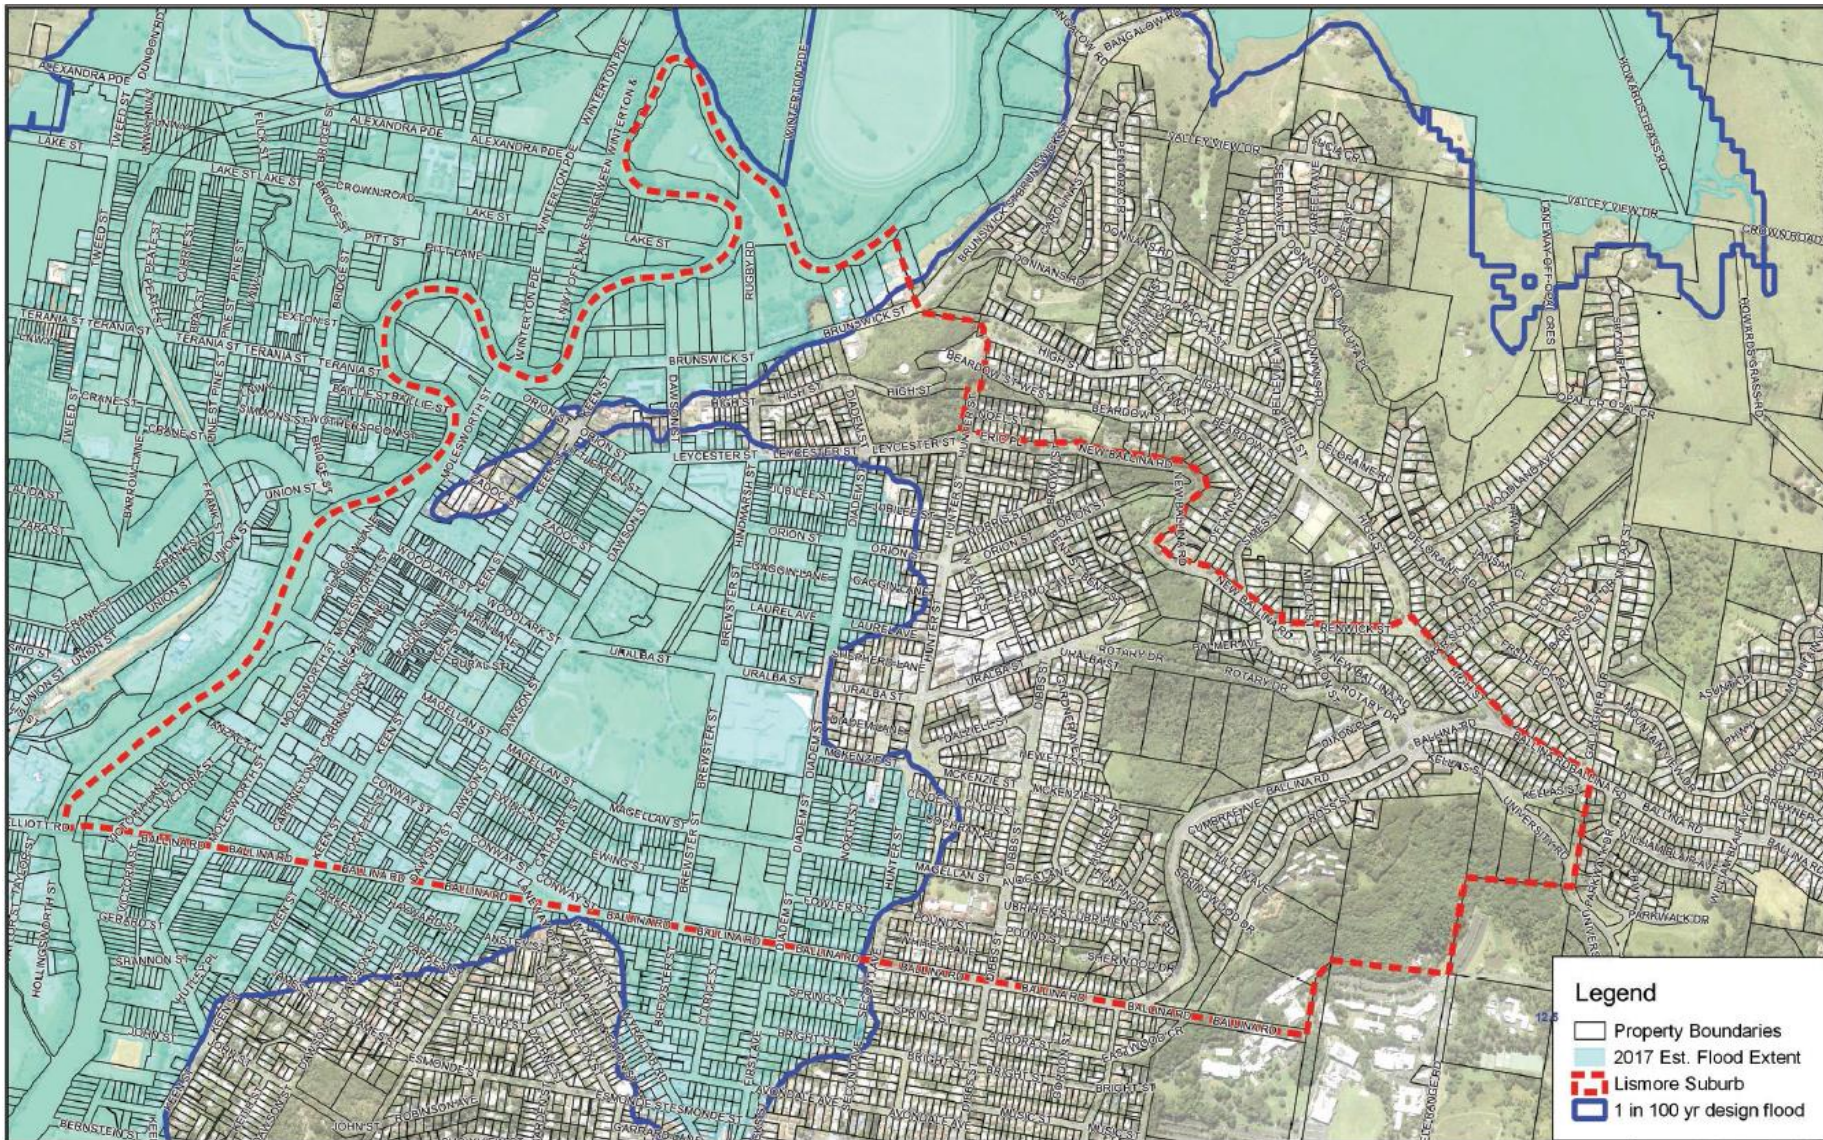

The information contained in this document has been provided to the Council from various sources. Some of the information has been verified by Council survey but in most instances the floor levels have been provided to Council and this document is a collation of the data. Therefore the information contained in this document is not endorsed by the Council as without error, omission or misdescription.

In providing the information in this document, Council does not profess to have any professional expertise or qualifications in matters covered by this information. Nor does Council hold itself out or represent to individuals or to the general public that it is or remains at any time the sole source of information on floods in Lismore and their impact.

The Council accordingly expressly disclaims all and any liability and responsibility in respect of loss, damage or injury to person or property arising from anything done or omitted to be done by any person in reliance, whether wholly or in part, upon any part of this information.

Any person having regard to the information contained in this document is encouraged to seek, at their discretion, all other sources of information on the subject matter as they consider appropriate, which may include local knowledge and/or professional advice.

The Lismore suburb boundaries are shown on the map overleaf along with the estimated extent of the 2017 flood and the 1 in 100 year ARI design flood extent.

Lismore Boundaries - and Estimated Flood Extents

1:10,500

Lismore Flood and Floor Levels – Lismore

1. Floor levels were initially recorded December 1996 with updates in March 2006 and at various times since. The first column in the table below notes the dates where updates have occurred. Where no colour is shown the data was collected in 1996.
2. All levels are in metres AHD (Australian Height Datum).
3. Rowing Club Gauge reading for expected flood events 1 in 10 year ARI is 10.95 metres AHD // 1 in 100 year ARI 12.4 metres AHD.
4. Note during a flood event the estimated flood height is measured at the Rowing Club Gauge. Due to flood gradient the flood height at the property will not be the same as that estimated at the Gauge and could differ by up to 0.6 metres or more (lower or higher), depending on the property's location.
